The **LSA-TB** series connectors are designed for safety, versatility and ease of use while providing a secure connection between tape light sections and lead wires. Can easily fit inside many aluminum channels that will accept a width of 0.47" (12mm) and up to .55in (14mm) for the high current version (LSA-TB-HWP-10A). Using an LSA-TB series connector provides the option of having a solderless connection and allowing for a quicker installation.
